Summary

Seeking an entry-level Web Developer role to apply my comprehensive knowledge of the **MERN** stack in a professional environment. A highly motivated and **quick learner**, aiming to gain hands-on experience while contributing to a team's success.

Skills

MERN

Building dynamic, full-stack web applications using MongoDB, Express.js, React, and Node.js to create seamless and responsive user experiences. ■ ■ ■ ■ □

MERN, MongoDB, Express.js, React, Node.js, Full-Stack, Web Development, API, REST

Problem Solving

Solved 600+ coding challenges on platforms like Codeforces(Pupil) and Codechef(2 star) using C++ and Python, with a strong focus on data structures and time complexity. ■ ■ ■ □ □

Data Structures, Algorithms, Competitive Programming, C++, Python, Codeforces, Codechef

Projects

Learnify

A full-stack application connecting language learners with tutors, featuring session booking and real-time reviews.

June'25 - present

∞ live link

Giggy

A full-stack freelance platform built to master the MERN stack, featuring a RESTful API, Firebase authentication, and a dynamic user dashboard.

May'25 - present
